To whom it may concern,

Just wanted to say "Thank You" for a great product and lightning-fast shipping. It helped in delivering a project on time.

I purchased the card to solve a problem with a brand-new Sonnet Tempo Pro SSD. I could not get the Sonnet Card to work despite working with their staff. Freezes, random unmounting of the Micron C400 SSDs in the Raid.

FirmTek on the other hand. Plugged it in, no problems so far.

THANK YOU!

Performance is good too, albeit when it did work, the Read was 1000 MB/s with the Sonnet card, vs. 720 MB/s with FirmTek. No difference in Write speed, due to the Micron's limit.

I'll take the reliability any day over a few extra MB/s.

Keep up the good work for the Mac!
